9. Central Administrative Services Building
10. Service

Multi-Disciplinary Classroom Building

This building has lecture rooms, computer labs, and a large classroom that is wired for distance education. It also has a large, interdisciplinary study space and an Innovation Center to facilitate research, evaluation, and development of new approaches to student learning. Offices for faculty and staff will be designed to support cooperative, interdisciplinary teaching.

4. Tot Lot/ Active Play Area
5. Soccer Field
6. Existing Computer Laboratory and Classrooms
7. Fire Access Lane
8. Staff Parking Lot
9. Existing Parking Lot
10. Tree Drifts

Child Development Center/ Classrooms

This Project will provide an on-campus facility for the Early Childhood Development (ECD) program. The proposed building will contain a variety of teaching, demonstration, and observation rooms for preschool children and toddlers. In addition a lab/ demonstration space will provide practical experience for students in the ECD classes. With this facility, ECD students will be able to participate in a brand-new, year-round training program, and will be able to complete their ECD Certificates and Degrees in a timely manner.
