Dear Board of Trustees,

Our nation, state and district are living through unprecedented and challenging economic times. Several factors have contributed to this challenging economic time. First, the State directed us to operate under a new state funding formula that negatively impacts our region and students. Next, the COVID-19 pandemic and shelter-in-place occurred, and we had to respond and convert, within three-days, 80-90% of our in-person classes to distance education. Today, we continue to adjust to the new funding formula and ongoing status of the pandemic. At the same time, we begin to brace ourselves for the certain, negative fiscal impact that the COVID-19 pandemic has taken on our national, state, and regional economy.

This proposed Final Budget for fiscal year 2020-21 has been developed consistent with our District's policies and procedures on planning and resource allocation, reflects the values and mission of our District and Colleges, while at the same time braces for anticipated reductions in state funding.

We should acknowledge that this budget is less than ideal. Although, we have a balanced budget, it is only balanced through the use of targeted reductions, freezing vacant positions, and use of hold-harmless funding. We are fortunate to have sufficient reserves and that we exercise prudent fiscal practices which will continue to ensure that our District remains financially stable and focused on serving students.

**CHABOT-LAS POSITAS COMMUNITY COLLEGE DISTRICT  
ADOPTED BUDGET  
Fiscal Year 2020-21**

**2020-21 Budget Assumptions**

These assumptions are for use in development of the 2020-21 district and college adopted budgets. As information is released by the Office of the Governor, Department of Finance, and State Chancellor's Office these assumptions will be adjusted accordingly.

**General Assumptions:**

1. The Adopted Budget reflects no changes in Unrestricted General Fund revenues, compared to fiscal year 2019-20.
2. The Adopted Budget continues to reflect the receipt of hold harmless funding, rather than revenues based upon the Student-Centered Funding Formula. This also includes one-time roll-back funding.
3. The 2020-21 Adopted Budget will be balanced through the use of:
  - a. Budgetary reductions
  - b. Salary and benefit savings from unfilled vacant and budgeted positions
  - c. Use of hold harmless funding
4. The 2020-21 Adopted Budget will have a contingency reserve of no less than 8%
5. The District and colleges will use planning documents and planning processes as a basis for the development of expenditure budgets.

**Revenue Assumptions:**

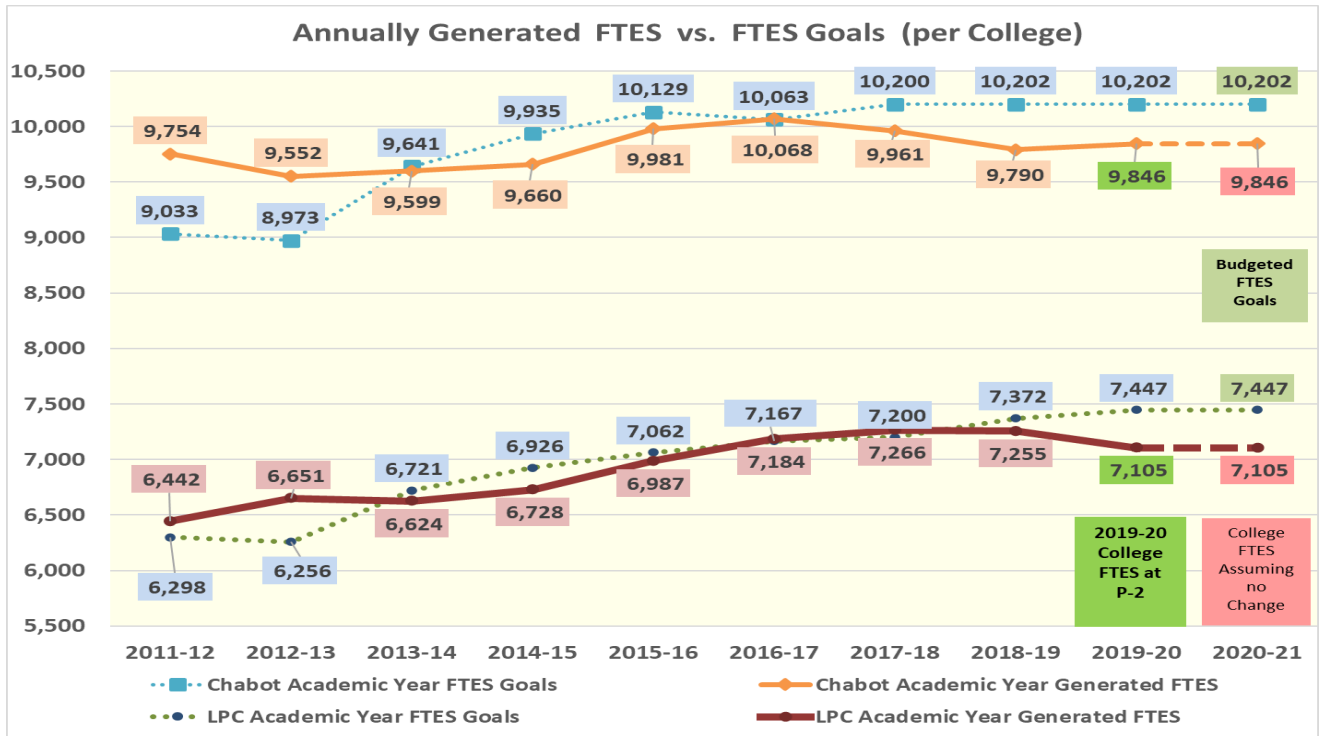

6. Anticipating the deferral of approximately \$21 million in general fund apportionment payments.
7. General apportionment deficit factor 1% for 2020-21.
8. The Cost of Living Adjustment (COLA) of 0.00% for 2020-21.
9. Enrollment Growth funding of 0% for 2020-21.
10. Funded base credit FTES of 16,639.38, DEMC recommended target of 17,505.
11. Funded base non-credit FTES of 360.10, DEMC recommended target of 144.
12. Funded Special Admit Credit FTES of 387.88, included in DEMC recommended target of 17,505.
13. Part time faculty budgets based upon Approved DEMC recommended FTES and productivity targets achieved.
14. Anticipated property tax receipts decline of 0.00% to \$0.00

**Expenditure Assumptions:**

15. The District intends to meet all negotiated contractual obligations
16. Current vacant and funded positions, all funding sources, will remain vacant. For the Adopted Budget, any salary and benefit savings associated will be used, to the greatest extent possible, to offset identified deficits.

17. Projected step and column salary increase of \$1.5 million
18. Projected statutory and health and welfare benefit increases of 9.48% (\$1.4 million)
19. Projected STRS decrease of .95%, from 17.01% to 16.15% (\$226,196)
20. Projected PERS increase of .979%, from 19.721% to 20.70% (\$592,045)
21. Funded vacant positions, aside from those identified as legally required or mandated, will be used to assist in addressing any structural deficits.
22. Any restricted funding cuts or cost increases must be borne by the respective program.

**CHABOT-LAS POSITAS COMMUNITY COLLEGE DISTRICT  
ADOPTED BUDGET  
2020-21**

**General Fund**

The General Fund is the primary operating fund of the district. It is used to account for those transactions that, in general, cover the full scope of operations of the district (instruction, administration, student services, maintenance and operations, etc.). All financial resources, and transactions except those required to be accounted for in another fund, shall be accounted for in the General Fund.

Examples of activities that should **not** be accounted for in the General Fund include non-instructional expenditures of the district's child development program, cafeteria, bookstore, or farm operations, which are accounted for within the Special Revenue or Enterprise Funds as determined by the district governing board. Similarly, resources used for major capital outlay projects, including Scheduled Maintenance and Special Repairs (SMSR), are accounted for in a Capital Projects Fund; and the accumulation of resources for the repayment of long term debt will be accounted for in a Debt Service Fund.

General purpose revenues received from the State may not be used to subsidize Community Service (*EC §78300*) or Contract Education (*EC §78021*) programs. Such programs must recover the actual costs, including administrative costs, of providing the programs from public or private contracts, contributions, donations, or user fees.

For purposes of flexibility, the district may establish any number of subfunds or accounts to constitute its General Fund; however, for financial reporting, these must be consolidated into either the Unrestricted Subfund (11) or Restricted Subfund (12).

Division of the General Fund into two subfunds reflects the need to differentiate truly discretionary revenue from restricted revenue, while preserving a complete accounting of the financial operation and support of educational programs. Accordingly, restricted revenues (such as those for categorically-funded programs) are accounted separately from other general purpose moneys, but classified as a component of the total fund that provides instructional and support services.

**General Fund Subfunds**

The Unrestricted Subfund is used to account for resources available for the general purposes of district operations and support of its educational program. The unrestricted subfund includes co-curricular funds.

The Restricted Subfund is used to account for resources available for the operation and support of the educational programs that are specifically restricted by laws, regulations, donors, or other outside agencies as to their expenditure.

**Cafeteria Fund**

Special Revenue Funds are used to account for the proceeds of specific revenue sources whose expenditures are legally restricted.

Activities such as cafeteria may provide non-classroom instructional or laboratory experience for students and incidentally create goods or services that may be sold. In the process of creating the incidental goods or services, expenditures are incurred. These expenditures are charged against revenue received as a direct result of the operations and, thus, not accounted for as part of the General Fund.

The Cafeteria Fund is the fund designated to receive all moneys from the sale of food or for any other services performed by the cafeteria when recovery of the cost of providing such services is not the objective of the governing board. If vending is an integral part of the district's food service, the activity should be recorded in this fund. Costs...may include the cost of housing and equipping the cafeteria and the cost of replacement of equipment and utilities if the governing board elects to subsidize such costs. The intent of the CCR §59013 appears to be for the food service operation to be a cost recovery rather than a revenue-producing activity.

If the district and/or college contract for its cafeteria operations and the contractor assumes all responsibilities for the operation, then the revenues, except for those which must be placed in a debt service fund, shall be treated as General Fund Unrestricted revenues.

*California Community Colleges Budget and Accounting Manual*

**BUDGET ASSUMPTIONS:**

**EXPENDITURES**

These expenses are for the maintenance of the cafeteria at Chabot College.

All commissions from vending machine sales are transferred to the Associated Students of Chabot College.

**Child Development Fund**

Special Revenue Funds are used to account for the proceeds of specific revenue sources whose expenditures are legally restricted.

Activities such as cafeteria and child development may provide non-classroom instructional or laboratory experience for students and incidentally create goods or services that may be sold. In the process of creating the incidental goods or services, expenditures are incurred in addition to those necessary solely for the educational benefit of students. These expenditures are charged against revenue received as a direct result of the operations and, thus, not accounted for as part of the General Fund

The Child Development Fund is the fund designated to account for all revenues for, or from the operation of, child care and development services, including student fees for child development services. Costs incurred in the operation and maintenance of the child care and development services are paid from this fund. However, those segments of child care and development activities that are part of the instructional activity of the college or district must be accounted for in the General Fund.

*California Community Colleges Budget and Accounting Manual*

**BUDGET ASSUMPTIONS:**

**REVENUES**

Revenues for the support of the child development center come from several sources including fees paid by parents, State preschool grants, Federal Head-start and local programs.

There is an Interfund Transfer in amounts of \$0 and \$97,000 from Chabot College and Las Positas College, respectively, to maintain a balanced budget.

**EXPENDITURES**

The expenditures for the operation of the child development center include the salaries and benefits of the staff and necessary supplies, such as learning materials and food for the children.

## **Economic Development and Contract Education**

District Economic Development and Contract Education works with companies to strengthen their organizational effectiveness, competitiveness, and profitability through education, training, and services.

Contract Education works with the colleges to address training needs that arise from local community partners. Contract Education provides timely assessment and training for those organizations, and the resulting profit strengthens the Colleges financially. Furthermore, these initial contacts broaden the Colleges' impact in the community and can ultimately benefit related organizations such as the College foundations.

The Proprietary Funds Group is used to account for those ongoing activities that, because of their income-producing character, are similar to those found in the private sector. All assets, liabilities, equities, revenues, expenses, and transfers relating to business or quasi-business activities are accounted for through these funds. The focus of proprietary fund accounting is on measuring the cost of providing services, and the degree to which this cost is being recovered through user charges.

Generally accepted accounting principles for the Proprietary Funds Group are similar to those employed in private sector accounting. GASB Statement No. 20, "Accounting and Financial Reporting for Proprietary Funds and Other Governmental Entities That Use Proprietary Fund Accounting," states that proprietary funds shall continue to follow FASB standards issued on or before November 30, 1989. However, from that date forward, proprietary funds have the option of either (1) choosing not to apply future FASB standards (including amendments of earlier pronouncements), or (2) continuing to follow new FASB pronouncements (unless they conflict with GASB guidance).

The Proprietary Fund Type consists of the Enterprise Funds and the Internal Service Funds.

Enterprise Funds are used to account for an operation when it is the intent of the governing board to operate as a business and to account for its total operating costs (direct and indirect, including depreciation). Such costs are finance or recovered primarily through user charges. Enterprise Funds may also be used when the periodic determination of revenues earned, expenses incurred, and/or net income is appropriate for capital maintenance, public policy, management control, accountability, or other purposes.

**Self-Insurance Fund**

The Self-Insurance Fund is the fund designated by EC §81602 to account for income and expenditures of self-insurance programs authorized by EC §72506(d). This fund is maintained in the county treasury and used to provide for payments on deductible types of insurance policies, losses or payments arising from self-insurance programs, and losses or payments due to noninsured perils.

The Self-Insurance Fund shall operate as an Internal Service Fund using accounting principles specified in GASB Statement No. 10, “Accounting and Financial Reporting for Risk Financing and Related Insurance Issues”. In accordance with Internal Service Funds accounting, the Self-Insurance Fund shall charge other funds for their proportionate share of the estimated premiums, claims and expenses incurred plus contingencies, and reflect the receipt of money as revenue.

*California Community Colleges Budget and Accounting Manual*

This fund is also referred to as the Retiree Unfunded Medical Benefit Liability (RUMBL) Fund. The District pays for the cost of medical benefits for qualified retirees. An actuarial study determined that the annual expense for these benefits would eventually rise to a level that could not be supported by the District’s normal operating budget. The annual increase in expenses is due to a combination of the increasing number of retirees and the increasing cost of the medical benefits.

The transfer amount for 2020-21 is \$7,847,691 based on actuarial assumptions.

**BUDGET ASSUMPTIONS:**

**REVENUES**

Sources of revenue are interest income and a transfer from the General Fund.

**EXPENDITURES**

The expenditures are based on the actual number of retirees and potential increase in medical benefit costs.

## Rating Action: Moody's assigns Aa2 to Chabot-Las Positas CCD CA's Election of 2016 General Obligation Bonds Series A GO

---

Global Credit Research - 22 May 2017

New York, May 22, 2017 -- Issue: Election of 2016 General Obligation Bonds, Series A; Rating: Aa2; Rating Type: Underlying LT; Sale Amount: \$325,000,000; Expected Sale Date: 06/06/2017; Rating Description: General Obligation;

### Summary Rating Rationale

Moody's Investors Service has assigned Aa2 to Chabot-Las Positas Community College District's (CA) \$325.0 million Election of 2016 General Obligation Bonds Series A. Moody's maintains a Aa2 rating on the district's outstanding general obligation bonds totaling \$536.5 million. The outlook is stable.

The Aa2 rating reflects the district's large and expanding tax base in the San Francisco Bay Area; above average socioeconomic profile of district residents; recently strengthened financial position with healthy reserves and liquidity; moderate debt and pension burdens; and strong management. The rating also considers the security of an unlimited property tax pledge of all taxable property within the district boundaries. Alameda and Contra Costa Counties, rather than the district, will levy, collect, and disburse the district's property taxes, including the portion constitutionally restricted to pay debt service on GO bonds, enhancing bondholder security.

### Rating Outlook

The stable outlook reflects our expectation that the district's tax base and local economy will remain strong, and continue to expand, over the next two years. Additionally, we anticipate that the district will maintain its recently strengthened financial profile.

### Factors that Could Lead to an Upgrade

- Sustained trend of improvement to the district's financial position
- Continued robust tax base growth

### Factors that Could Lead to a Downgrade

- Significant deterioration of financial metrics, including reserves and liquidity
- Material loss of enrollment

### Legal Security

The bonds are secured by the levy of ad valorem taxes, unlimited as to rate or amount, upon all taxable property within the district. The portion of the levy restricted for debt service is collected, held and transferred directly to the paying agent by Alameda and Contra Costa Counties on behalf of the district.

### Use of Proceeds

Bond proceeds will fund various district facility improvements under the Measure A Bond Program approved in 2016.

### Obligor Profile

Chabot-Las Positas Community College District (CCD) spans 559.4 square miles in southeastern Alameda County (Aaa Issuer Rating/ Stable) and a small portion of Contra Costa County (Aa2 Issuer Rating/Stable). The district serves approximately 17,230 full-time equivalent students (FTEs) at its two colleges, Chabot in Hayward (Aa2 Issuer Rating/No Outlook), and Las Positas in Livermore. The district's service area has an estimated population of 600,000, and also includes the cities of Pleasanton, San Leandro (Aa2 Issuer

**Rationale**

S&P Global Ratings raised its long-term rating to 'AA' from 'AA-' on Chabot-Las Positas Community College District (CCD), Calif.'s general obligation (GO) bonds outstanding. The upgrade is based on our view of the district's maintenance of good operations in the past three audited years, which has built reserves to a level we consider very strong. At the same time, we assigned our 'AA' long-term rating to the district's election of 2016 series A GO bonds. The outlook is stable.

The rating further reflects our view of the district's:

- Full participation in the deep and diverse San Francisco Bay Area metropolitan statistical area, with strong to extremely strong income and wealth indicators;
- Very diverse tax base, which has grown in recent years;
- Projected surplus for fiscal 2017 that would maintain very strong reserves levels; and
- Expenditure flexibility common to community college districts as a result of the ability to independently set course offerings.

In our opinion, the preceding strengths partly offset by the district's moderate to high debt levels and slow debt amortization.

Revenue from unlimited ad valorem taxes levied on taxable property within the district secures the district's GO bonds. The Alameda County Board of Supervisors has the power and obligation to levy these taxes at the district's request for the bonds' repayment. The series A bonds will finance the acquisition, construction, modernization, and equipping of district sites and facilities.

The CCD was founded in 1961 and serves the San Francisco East Bay Area, particularly southern Alameda County, through its two colleges: Chabot College in Hayward and Las Positas College in Livermore. The colleges specialize in university transfer, technical training, continuing education, workforce development, and contract education. The two campuses are within an easy commute of Oakland and San Francisco. Most of the district's operating revenue comes from state funding

allocated based on full-time-equivalent students (FTES). In fiscal 2015, the district had 17,197 funded students and no unfunded students, and for fiscal 2016, the district increased enrollment to 17,362 funded students. The district reports its funded cap is 17,500. For fiscal 2017, the district has budgeted for 17,230 FTES, a conservative figure as it can be funded based on the prior year's FTES. The district has budgeted for a 1% increase in FTES in fiscal 2018. We understand the district has implemented enrollment initiatives such as marketing to current students to increase the number of classes taken, which could boost FTES and, in turn, increase revenues. District officials also expect that a slackening economy could lead to increases in enrollment over the next cycle of economic downturn. Furthermore, several residential developments occurring within the district's boundaries could foster population growth and long-term enrollment potential.

The CCD has maintained a strong financial position in the past four audited years as state funding improvements supported a strong trend of operations with general fund operating surpluses from fiscal 2013 through fiscal 2016. By fiscal 2016, the CCD's unrestricted general fund balance reached \$26.3 million, or 19% of expenditures, which we consider very strong and which is well above the 5% level mandated by the state. The district ended fiscal 2016 with an operational surplus of \$10 million, a result made possible by significant one-time funding from the state, according to the district. The district has earmarked some of these funds for scheduled maintenance and instructional equipment in future years. The district's fiscal 2017 estimates show an additional surplus of \$1.8 million in the unrestricted fund balance, which would improve it to \$28.2 million. Based on the governor's May revise, the district expects to receive an additional \$2.6 million in funding for fiscal 2018. The district expects to post another operating surplus in fiscal 2018. Therefore, we do not expect that reserves will fall below very strong levels over the near term.

The CCD serves nine cities throughout Alameda and Contra Costa counties and has an estimated resident population of approximately 677,000. More than 99% of the tax base is located in Alameda County, and a very small portion is located in Contra Costa County. Alameda County's income levels are above average, in our view, with median household effective buying income (EBI) and per capita EBI at 133% and 129% of the national averages, respectively.

Like in many California regions, assessed valuation (AV) within the CCD has risen in recent years. During the past three years, the CCD's AV increased at an average annual rate of 6.5% to reach \$110 billion in fiscal 2017. Market value per capita remains extremely strong, in our opinion, at approximately \$163,065. We consider the CCD's tax base to be very diverse, with the leading 10 taxpayers representing just 2.6% of total AV.

We view the district's management as adequate, with standard financial policies and practices under our Financial Management Assessment methodology, indicating the finance department maintains adequate policies in some but not all key areas.

The district budgets revenues based on available external state revenue assumptions and using an internal committee to track FTES, while expenditures include reasonably conservative assumptions on cost growth. The district's board reviews budget-to-actuals at least quarterly, and the district has mechanisms to amend the budget. However, there is no financial forecasting for future years beyond anticipated rate increases for pension costs. Other highlights of the district's policies and practices include an investment policy; the maintenance of a reserve policy targeting reserve levels equal to 8% of the operating budget, which is above the 5% California Community Colleges Chancellor's Office recommended reserve threshold; and at least monthly monitoring and reporting of the operating budget to the board to allow corrective actions if needed. The district has a five-year capital improvement plan that it updates at least annually by identifying funding sources and reprioritizing projects as it considers necessary. The district has an investment policy in addition to the county's policy and reports investment performance annually to the board. However, the district does not have a formal debt management policy.

In our view, overall net direct debt is high on a per capita basis, at about \$5,082, and moderate as a percentage of market value, at 3.1%. The district obtained \$950 million in voter authorization in 2016 to fund its campus upgrade projects. The district anticipates future issuances, staggered about every three years.

The district offers pension benefits to employees and participates in the California Public Employees' Retirement System and California State Teachers' Retirement System (STRS) and has fully paid its annual required contribution (ARC) in each of the past three fiscal years. In 2016, the district paid \$6.1 million, or 3.8% of general fund expenditures. The district's plan fiduciary net position as a percentage of the total pension liability for its STRS plan is 70%. The district offers other postemployment benefits (OPEBs) and recognizes and funds expenditures on a pay-as-you-go-basis. The district had an unfunded actuarial accrued liability of \$53.4 million as of June 30, 2016, and it paid \$5.2 million of its \$11.9 million ARC in fiscal 2016. Management reported that it eliminated OPEBs for employees hired after 2012, thus limiting the district's future exposure to benefit increases.

## Outlook

The stable outlook reflects our view that the district will continue to run balanced operations within the two-year outlook time frame, during which time we do not anticipate changing the rating.

### Upside scenario

We could consider a higher rating if the district obtains revenue flexibility in the form of additional local revenue sources, such as a parcel tax, and if management policies and practices become more comprehensive and formal in the areas of long-term financial projections and reserve policies.

### Downside scenario

We could lower the rating if the district draws on reserves and reduces budgetary flexibility to levels we no longer view as commensurate with those of peers.

**Book Value:** Value as shown in the “book” of accounts. In the case of assets subject to reduction by valuation allowances, “book value” refers to cost or stated value less any appropriate allowance. A distinction is sometimes made between “gross book value” and “net book value”, the former designating value before allowances, and the latter after their deduction. In the absence of any modifier, however, “book value” is synonymous with “net book value.”

**Books of Original Entry:** The ledgers in which transactions are formally recorded for the first time (e.g. the cash journal, check register, or general journal). With automated bookkeeping methods, one transaction may be recorded simultaneously in several records, one of which may be regarded as the book of original entry. Memorandum books, check stubs, files of duplicate sales invoices, etc., whereon first or prior business notations may have been made, are not books of original entry in the accepted meaning of the term, unless they are also used as the medium for direct posting to the ledgers.

**Bookstore Fund:** The fund designated to account for operation of the college store.

**Budget:** A plan of financial operation for a given period consisting of an estimate of expenditures and the proposed means of financing them. The most common assumptions of budgeting include:

□ Centralized Budget: This budget localized resource allocation into central operations. A strategy used to provide additional control is usually instituted when resources are reduced. This tends to be a leaner allocation since there is only a single institutional contingency needed.

□ Decentralized Budget: This budget process allows resource allocation to take place outside of central operations, giving greater control to the programs that have direct interaction with students. Because the contingency must be spread over a large number of departments or programs, these budgets tend to be larger than those of the same size organization with a centralized budget.

□ Incremental or Rollover Budget: This is the most widely used form of budgeting in higher education. It assumes that each year is relatively the same and that any new activity is an add-on. It is the most efficient, cost-effective way to budget and usually has a large centralized component. It focuses on inputs rather than outcomes.

□ Zero-based Budget: This type of budget assumes that each year stands on its own. All expenditures must be justified each year. This strategy creates a very lean budget with only known expenditures present.

□ Formula Budget: Objective formulas based on systematic data are used to distribute resources to ensure each program or entity is receiving a fair share. This is most often used at the state level.

□ Planning, Programming, and Budgeting Systems (PPBS): This system focuses on cost benefits and continuous analysis of alternatives for each program and systematically links them to the strategic plan.

□ Incentive-Driven Budget: This budget falls into two categories. The first is used at the state level to provide up-front funding to achieve a specific outcome. The second is used in research institutes to decentralize resource allocation to the various departments so that more timely and accurate decisions can be made.

□ Performance-Driven Budget: This process uses performance measures to allocate resources and is used primarily at the state level. In this model the funding comes after the measures have been achieved. It has been successfully implemented in the K-12 environment.

□ Responsibility/or Cost Center Budget: This model recognizes that each instructional program can stand on its own and has a relative ability to generate income. This model allocates all of the revenue to each department and uses a charge back or tax to cover the expenses of the cost centers like central services.

**Budget Document:** The instrument used by the budget-making authority to present a comprehensive financial program to the governing authority (form CCFS-311 for California Community Colleges). **Contracted Services:** Services rendered by personnel who are not on the payroll of the college system, including all related expenses covered by the contract.

**Contributed Capital:** The permanent fund capital of a proprietary fund. Contributed capital forms one of two classifications of equity found on the balance sheet of a proprietary fund. Contributed capital is created when a residual equity transfer is received by a proprietary fund, when a fixed asset is “transferred” to a proprietary fund, or when a grant is received that is externally restricted to capital acquisition or construction. Contributions restricted to capital acquisition and construction and fixed assets received from developers and customers, as well as amounts of tap fees in excess of related costs, also would be reported in this category.

**Controlling Account:** A summary account, usually maintained in the general ledger, in which is recorded the aggregate of debit and credit postings to a number of identical, similar, or related accounts called subsidiary accounts. Deferred charges differ from prepaid items in that they usually extend over a long period of time and are not regularly recurring costs of operations which are paid for prior to their occurrence. Examples include discounted bonds sold and prepaid expenses, such as insurance.

**Deferred Revenue:** Revenue received prior to being earned such as bonds sold at a premium,

advances received on Federal or State program grants, or enrollment fees received for a subsequent period.

**Depreciation:** Expiration in the service life of fixed assets, other than wasting assets, attributable to wear and tear, deterioration, action of the physical elements, inadequacy and obsolescence. In accounting for depreciation, the cost of a fixed asset, less any salvage value, is prorated over the estimated service life of such an asset, and each period is charged with a portion of such cost. Through this process, the entire cost of the asset is ultimately charged off as an expense.

**Designated Income:** Income received for a specific purpose.

**Direct Activity Charges:** Charges for goods or services that exclusively benefit the activity.

Educational administrators

include, but are not limited to, chancellors, presidents, and other supervisory, or management employees designated by the governing board as educational administrators.

**Electronic Data Processing (EDP):** Data processing by means of electronic equipment.

(Social Security) taxes and workers' compensation payments. These amounts are not included in the gross salary, but are over and above. While not paid directly to employees, they are a part of the total cost of employees.

**Encumbrances:** Commitments related to unperformed (executory) contracts for goods or services. Used in budgeting, encumbrances are not GAAP expenditures or liabilities, but represent the estimated amount of expenditures ultimately to result if unperformed contracts in process are completed.

**Enterprise Funds:** A subgroup of the Proprietary Funds Group used to account for operations when the governing board has decided either that the total cost of providing goods and services on a continuing basis (expenses including depreciation) be financed or recovered primarily through user charges; or that the periodic determination of revenues earned, expenses incurred, and/or net income is appropriate for capital maintenance, public policy, management control, accountability, or other purposes.

**Entitlement:** The amount of payment to which an entity is entitled pursuant to an allocation formula contained in applicable statutes.

**Estimated revenue:** Expected receipt or accruals of moneys from revenue or nonrevenue

sources during a given period.
