

Severe Winds

- Windstorms severe enough to cause damage may occur at infrequent intervals and may be accompanied by torrential rains.
- At the time of warning of impending severe winds, property and equipment not properly anchored should be moved inside a building or tied down. Close windows.
- The best protection in severe winds is in permanent buildings. As a result, steps will be taken to ensure the safety of students/personnel **within** buildings rather than to evacuate.
- Time permitting, students in temporary structures will be moved to a permanent structure.
- Immediately after the cessation of severe winds, personnel from Maintenance and Operations and Campus Safety and Security will inspect the campus for damage.
