

CHABOT-LAS POSITAS COMMUNITY COLLEGE DISTRICT

June 16, 2015

Agenda Item: 4.9

Subject: Acceptance of Donation of Equipment, Chabot College

Background: Ardenbrook, Inc. of Fremont, California wishes to donate the following equipment to Chabot College:

The L.K. Machinery TC-510 is an Ultra compact High Speed Computer Numerically Controlled Machining and Tapping Center. It has a 16 station tool changer and comes complete with the required BT-30 tooling. It is designed for light duty high speed machining, which is exactly what is done in Machine Tool classes. The machine runs well and appears to be in "Like New" condition, with only has a few hundred hours of operation. The College highly recommends that this donation be accepted. It will be a valuable addition to the Chabot College Machine Tool program.

Recommended Action: That the Board of Trustees accepts the donation of equipment, The L.K. Machinery TC-510, valued by the donor at \$45,000, from Ardenbrook, Inc. of Fremont California. It is further recommended that the Board authorize the Vice Chancellor, Business Services, to accept the donation on behalf of the District.
